4. FIRST AID MEASURES

Ingestion : Do not induce vomiting. Seek medical attention immediately.

PSDS (Product Safety Data Sheet)

Inhalation : Move to fresh air. If irritation persists, seek medical attention.

Skin Contact : Remove contaminated clothing and wash skin with soap and water. If irritation persists, seek medical attention.

Eye Contact : Immediately flush eyes thoroughly with water for at least 15 minutes. Seek medical attention if irritation persists.

Note : Damaged battery will release concentrated potassium hydroxide, which is caustic.

5. FIRE FIGHTING MEASURES

Hazardous Combustion Products : Thermal degradation may produce hazardous fumes of zinc and manganese; hydrogen gas, caustic vapors of potassium hydroxide and other toxic by-products.

Extinguishing Media : Use any extinguishing media that is appropriate for the surrounding area.

Protection of Firefighters : Specific Hazards Arising from the Material : Batteries may burst and release hazardous decomposition products when exposed to a fire situation.

Protective Equipment and Precautions for Firefighters : Firefighters should wear positive pressure selfcontained breathing apparatus and full protective clothing.

6. ACCIDENTAL RELEASE MEASURES

Notify safety personnel of large spills. Caustic potassium hydroxide may be released from leaking or ruptured batteries. Clean-up personnel should wear appropriate clothing to avoid eye and skin contact and inhalation of vapors and fumes. Ventilate area. Carefully collect batteries and place in an appropriate container for disposal.

7. HANDLING AND STORAGE

Precautions To Be Taken in Handling : Avoid mechanical or electrical abuse. DO NOT short circuit or install incorrectly. Batteries may rupture or vent if disassembled, crushed, recharged or exposed to high temperatures. Install batteries in accordance with equipment instructions.

Precautions To Be Taken in Storage : Store batteries in a dry place at normal room temperature. Do not refrigerate – this will not make them last longer.
